Chlorine

DIRECTOR OF CENTRAL INTELLIGENCE  
Security Committee

SECOM-D-319  
11 April 1978

MEMORANDUM FOR: Robert W. Gambino  
Chairman

FROM:   
DCI Security Committee

SUBJECT: Security Committee Items of Interest ☐

☐ This is for your information on items of interest not otherwise reported to you which involved Security Committee staff during the week of 3-7 April 1978.

a. ☐ Comments on the final draft revision of E.O. 11652 on security classification were provided OGC for use by Mr. Lapham in the 10 April meeting of department and agency general counsels to discuss that draft. There were several problem areas in the final draft from a DCI standpoint. Appropriate corrective language or action was recommended to OGC.

b. ☐ A quick review was made of the security procedures drafted for the Imagery Transmission System - Washington (ITS-W) by CIA.

It was scheduled to become operational on 10 April 1978. The review showed that the draft procedures were good. One minor change was recommended by us and accepted by the drafter to ensure thorough and timely reporting of transmission losses.
